

## Software Engineer

RStor was founded with the mission to connect the world's computing resources. The RStorMulticloud Platform™ is the first to aggregate and automate compute resources from private data centers, public cloud providers, and trusted supercomputing centers on a next generation networking fabric. Headquartered in Saratoga, CA, RStor has raised \$45 million in a series A funding round, led by Cisco Investments. Learn more at <https://rstor.io/>.

At RStor we are building a culture that emphasizes open-minded, collaborative teamwork, and an ability to take responsibility and rise to the challenges of creating major shifts in cloud technology. A demonstrated willingness to step out of your comfort zone and solve problems in new, inventive ways is a must. We're looking for independent thinkers who are comfortable contributing to the larger goals of the team, and nimble enough to adapt to market and data-driven changes.

If you're creative, driven and passionate about applying advanced technology to solve some of the world's biggest and most important problems, you'll be among friends at RStor.

### Responsibilities:

The team members supporting RStor have extensive experience in Linux, software development and hands on experience with many of the common modern-day technologies and languages containers (Docker/Singularity), Kubernetes, C, Go, Python, Jenkins, Artifactory, Ansible, etc.).

### Your day-to-day

- Drive for key results as a team lead or individual contributor
- Design, architect and prototype key features
- Work with junior team members to implement features
- Contribute to the development of sound engineering infrastructure and process
- Maintain high-quality code base which is well factored, performant and robust
- Collaborate closely with team members to initiate new features
- Mentor junior engineers on best software development practices.
- Some travel to our Italian development office.
- Other duties as assigned.

### Job Qualifications:

- You have 2+ years of work experience.

- 2+ years of software development experience in one or more object-oriented languages, including Python, C/C++ or Go.
- 2+ years of experience with storage, networking and building scalable products or services.
- BA/BS in Computer Science or equivalent
- Working knowledge of SQL and relational databases such as PostgreSQL or MySQL
- Experience building and operating distributed systems
- Excellent debugging and optimization skills
- Unit/integration testing experience
- Ability to own and drive projects

**Bonus:**

- Experience with message queues (Kafka, RabbitMQ, etc)
- Experience with key-value data stores (Redis, HBase, HDFS, Cassandra, or other)
- Experience with CDN and Edge type deployments
- Familiarity with TCP/IP or DNS
- Experience with API tooling and standards (Swagger/OpenAPI, OAuth/JWT)

Please send resume to [careers@rstor.io](mailto:careers@rstor.io) and the Title of this position in the Subject of your email.
