

Site Operations Engineer

Come join the Infrastructure team at RStor and help us scale across the globe.

RStor was founded with the mission to connect the world's computing resources. The RStorMulticloud Platform™ is the first to aggregate and automate compute resources from private data centers, public cloud providers, and trusted supercomputing centers on a next generation networking fabric. Headquartered in Saratoga, CA, RStor has raised \$45 million in a series A funding round, led by Cisco Investments. Learn more at <https://rstor.io/>.

At RStor we are building a culture that emphasizes open-minded, collaborative teamwork, and an ability to take responsibility and rise to the challenges of creating major shifts in cloud technology. A demonstrated willingness to step out of your comfort zone and solve problems in new, inventive ways is a must. We're looking for independent thinkers who are comfortable contributing to the larger goals of the team, and nimble enough to adapt to market and data-driven changes.

If you're creative, driven and passionate about applying advanced technology to solve some of the world's biggest and most important problems, you'll be among friends at RStor

Responsibilities:

- Global deployment of RStor infrastructure at core and edge sites
- Technical interface to technology suppliers and datacenter providers
- Technical interface to integration partners
- Work closely with internal teams to determine datacenter and rack layouts, power consumption, redundancy, etc.
- Support full infrastructure lifecycle: bring up, upgrade, and end of life disposition
- Participate in emergency response team for any site related issues
- Coordinate with deployment teams and remote hands
- Perform datacenter evaluations, to determine compliance to RStor standard
- Up to 50% travel

Job Qualifications:

- Degree and technical background in Computer Science, Computer Engineering, or Information Systems
- 5 years related job experience
- Familiarity with servers, network gear, system administration, and related data center infrastructure at rack scale (PDUs, racks, cabling, etc.)
- Experience installing at multiple datacenters in remote locations

Please send resume to careers@rstor.io and the Title of this position in the Subject of your email.
